Test

Please use a pencil to complete the test. Print your name on the Name line above. Read the instructions for each section carefully. When you have completed the test, place your test face down on your desk and raise your hand.

__ 1

1. Communication between a computer and a keyboard involves ______________ transmission.

   In simplex mode, the communication is unidirectional, as on a one-way street. Only one of the two devices on a link can transmit; the other can only receive (see Figure 1.2a). Keyboards and traditional monitors are examples of simplex devices.

   (A) Automatic
   (B) Full-duplex
   (C) Simplex
   (D) Half-duplex

   Notes: https://www.sanfoundry.com/computer-networks-mcqs-basics/

__ 1

2. **Communication between two devices can be simplex, half-duplex, or full-duplex as shown in Figure 1.2.**

   Which of the following isn't a type of transmission mode?

   (A) physical
   (B) simplex
   (C) full duplex
   (D) half duplex

   Notes: https://www.sanfoundry.com/computer-fundamentals-questions-answers-transmission-modes/

__ 1

3. A transmission that generally involves dedicated circuits.

   In simplex mode, the communication is unidirectional, as on a one-way street. Only one of the two devices on a link can transmit; the other can only receive (see Figure 1.2a).

   (A) simplex
   (B) half duplex
   (C) full duplex
   (D) semi-duplex

   Notes: https://www.sanfoundry.com/computer-fundamentals-questions-answers-transmission-modes/

__
1
4. A transmission mode that can transmit data in both the directions but transmits in only one direction at a time.

In half-duplex mode, each station can both transmit and receive, but not at the same time. When one device is sending, the other can only receive, and vice versa (see Figure 1.2b).

(A) simplex (B) half duplex
(C) full duplex (D) semi-duplex

Notes: https://www.sanfoundry.com/computer-fundamentals-questions-answers-transmission-modes/

__
1
5. Telephone networks operate in this mode.

One common example of full-duplex communication is the telephone network. When two people are communicating by a telephone line, both can talk and listen at the same time.

(A) simplex (B) half duplex
(C) full duplex (D) semi-duplex

Notes: https://www.sanfoundry.com/computer-fundamentals-questions-answers-transmission-modes/

__
1
6. A walkie-talkie operates in ____________

half-duplex transmission, the entire capacity of a channel is taken over by whichever of the two devices is transmitting at the time. Walkie-talkies and CB (citizens band) radios are both half-duplex systems.

(A) simplex (B) half duplex
(C) full duplex (D) semi-duplex

Notes: https://www.sanfoundry.com/computer-fundamentals-questions-answers-transmission-modes/

__ 1

7. Data can flow only in one direction all of the times in a _________ mode.

In simplex mode, the communication is unidirectional, as on a one-way street. Only one of the two devices on a link can transmit; the other can only receive (see Figure 1.2a).

(A) simplex (B) half-duplex

(C) full-duplex (D) None of the choices are correct

Notes: https://highered.mheducation.com/sites/0073376221/student_view0/chapter1/quizzes.html

__ 1

8. Data can flow only in both direction all of the times in a _________ mode.

The full-duplex mode is like a two-way street with traffic flowing in both direc tions at the same time. In full-duplex mode, signals going in one direction share the capacity of the link with signals going in the other direction.

(A) simplex (B) half-duplex

(C) full-duplex (D) None of the choices are correct

Notes: https://highered.mheducation.com/sites/0073376221/student_view0/chapter1/quizzes.html

__ 1

9. Both stations can transmit and receive data simultaneously in ....

The full-duplex mode is like a two-way street with traffic flowing in both direc tions at the same time. In full-duplex mode, signals going in one direction share the capacity of the link with signals going in the other direction.

(A) simplex mode (B) half duplex mode

(C) full duplex mode (D) unicode

Notes: https://mcqslearn.com/cs/computer-networks/quiz/quiz-questions-and-answers.php?page=20

__ 1 10. A......is the physical path over which a message travels.

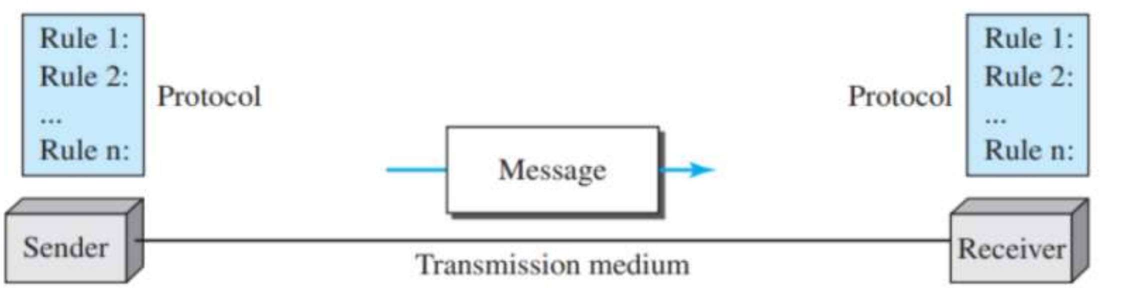
Transmission medium. The transmission medium is the physical path by which a message travels from sender to receiver

(A) path (B) medium

(C) protocol (D) route

__ 1 11. Which of these element is not involved in the process of communication?

Five components of data communication



(A) pipe (B) sender

(C) message (D) channel

__ 1 12. A......set of rules that governs data communication

Protocol. A protocol is a set of rules that govern data communications. It repre sents an agreement between the communicating devices. Without a protocol, two devices may be connected but not communicating, just as a person speaking French cannot be understood by a person who speaks only Japanese

(A) protocols (B) standards

(C) RFCs (D) Servers

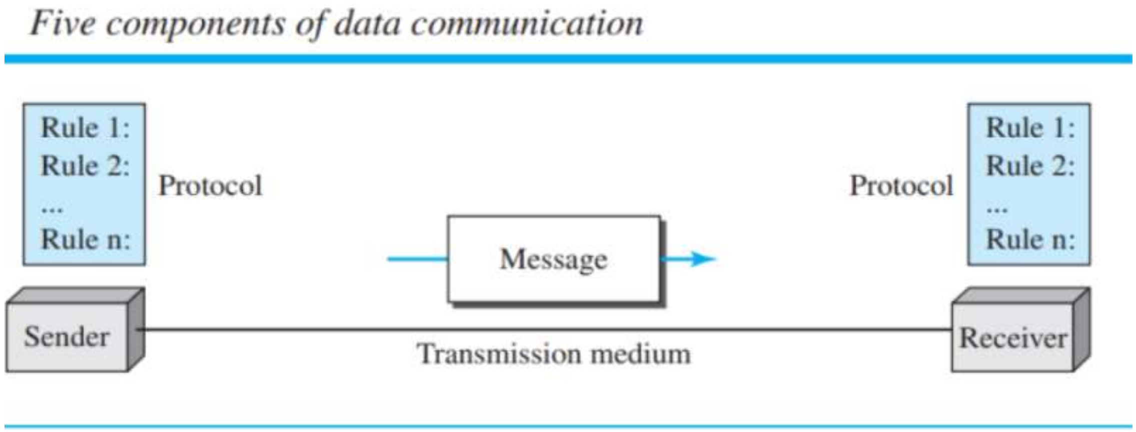
__ 1 13. A ....is the person who transmits a message.

sender is the device that sends the data message. It can be a com puter, workstation, telephone handset, video camera.

(A) Receiver (B) sender

(C) Message (D) Transmission medium. T

__ 1 14. Which of the following is not one of the components of a data communication system?



(A) Sender
(B) messege
(C) meduim
(D) All of the choices are correct

__ 1 15. The function of the data transmission element is.......

Data communications are the exchange of data between two devices

(A) to transfer data from one element to another
(B) to Modify the data
(C) to process the data
(D) to separate the signal hidden in the noise

__ 1 16. Any set of digits or alphabets are generally referred as ______________

(A) Characters
(B) Symbols
(C) Bits
(D) Bytes

__ 1 17. what is a pixel?

Images are also represented by bit patterns. In its simplest form, an image is composed of a matrix of pixels (picture elements),

(A) pixel is the element of a digital image
(B) pixel is the element of an analog image
(C) pixel is the cluster of a digital image
(D) pixel is the cluster of an analog image

__ 1 18. Which color model is used for most computer model and video systems?

There are several methods to represent color images. One method is called RGB, so called because each color is made of a combination of three primary colors: red, green, and blue.

(A) RGB (B) RYB
(C) CMU (D) HSV

__ 1 19. what does ASCII stand for?

The American Standard Code for Infor mation Interchange (ASCII),

(A) American Standard Code for Information Interchange
(B) American Scientific Code for information interchange
(C) American Scientific Code for interchanging information
(D) American Standard Code for interchanging information

__ 1 20. The largest geographic area a wide area network (WAN) can span is ________________.

a WAN has a wider geographical span, spanning a town, a state, a country, or even the world.

(A) a town (B) a state
(C) a country (D) the world

Notes: https://highered.mheducation.com/sites/0073376221/student_view0/chapter1/quizzes.html

__ 1 21. Data communication system spanning states, countries, or the whole world is _________

a WAN has a wider geographical span, spanning a town,

a state, a country, or even the world.

(A) LAN (B) WAN
(C) MAN (D) PAN

Notes: https://www.sanfoundry.com/computer-networks-mcqs-topology/

__ 1 22. WAN stands for __________

A wide area network (WAN) is also an interconnection of devices capable of communication. However, there are some differences between a LAN and a WAN.

(A) World area network
(B) Wide area network
(C) Web area network
(D) Web access network

Notes: https://www.sanfoundry.com/computer-networks-mcqs-topology/

__ 1 23. What is the purpose of a WAN?

a WAN has a wider geographical span, spanning a town, a state, a country, or even the world.

(A) To allow computers to communicate with each other in the same area
(B) To allow computers to communicate with each other - anywhere in the world
(C) To allow computers to communicate with each other in the same country
(D) To allow computers to communicate with each other in the home

Notes: https://quizizz.com/admin/quiz/5dbf6c102af6a1001a2e2b2c/lan-man-wan

__ 1 24. The Word Wide Web (WWW) is the largest ...

(A) Local Area Network (LAN)
(B) Wide Area Network (WAN)
(C) Metropolitan Area Network (MAN)

Notes: https://quizizz.com/admin/quiz/5dbf6c102af6a1001a2e2b2c/lan-man-wan

__ 1 25. Wide Area Networks (WANs)

A wide area network (WAN) is also an interconnection of devices capable of communication. However, there are some differences between a LAN and a WAN. A LAN is normally limited in size, spanning an office, a building, or a campus; a WAN has a wider geographical span, spanning a town, a state, a country, or even the world. A LAN interconnects hosts; a WAN interconnects connecting devices such as switches, routers, or modems. A LAN is normally privately owned by the organization that uses it; a WAN is normally created and run by communication companies and leased by an organization that uses it. We see two distinct examples of WANs today: point-to-point WANs and switched WANs

A cover a large geographical area

B use cables, telephone lines, satellites and radio waves to connect

C are used by international organisations

D All 3 options

Notes: https://quizizz.com/admin/quiz/5ebea84ae65fe6001bb442fd/networks-topologies?fromSearch=true&source=null

__ 1 26. How is software reliability defined?

In addition to accuracy of delivery, network **reliability** is measured by the frequency of failure, the time it takes a link to recover from a failure, and the network's robustness in a catastrophe.

A time

B efficiency

C quality

D speed

Notes: https://www.sanfoundry.com/software-engg-mcqs-software-reliability/

Question:6

__ 1 27. A local area network (LAN) is defined by.......

We use a few criteria such as size, geographical coverage, and ownership

(A) the geometric size of the network
(B) the maximum number of hosts in the network
(C) the maximum number of hosts in the network and/or the geometric size of the network
(D) the topology of the network

Notes: https://highered.mheducation.com/sites/0073376221/student_view0/chapter1/quizzes.html

Question:1

__ 1 28. WLAN stands for.........

A local area network (LAN)

(A) Wireless Local Area Network
(B) Wire Lost Area Network
(C) Wireless Local Ambiguity Network
(D) Wired Local Area Network

Notes: https://testbook.com/objective-questions/mcq-on-lan-technologies--5eea6a0939140f30f369d915

Question:9

__ 1 29. Which of the following is a type of wireless communication?

two types of networks, LANs and WANs,

(A) LAN
(B) WAN
(C) PAN
(D) All of the mentioned

Notes: https://www.sanfoundry.com/1000-wireless-mobile-communications-questions-answers/

Question:3

__ 1 30. Which of the following is not one of the network criteria?

A network must be able to meet a certain number of criteria. The most important of these are performance, reliability, and security.

- (A) Performance
- (B) Reliability
- (C) Security
- (D) All of the choices are correct

Notes:
https://highered.mheducation.com/sites/0073376221/student_view0/chapter1/quizzes.html

Question:8

__ 1 31. Which of the following is a small single site network?

A **local area network (LAN)** is usually privately owned and connects some hosts in a single office, building, or campus. Depending on the needs of an organization, a LAN can be as simple as two PCs and a printer in someone's home office, or it can extend throughout a company and include audio and video devices. Each host in a LAN has an

- (A) LAN
- (B) DSL
- (C) MAN
- (D) WAN

Notes: https://testbook.com/objective-questions/mcq-on-lan-technologies--5eea6a0939140f30f369d915

Question:14

__ 1 32. A term that refers to the way in wich the nodes of a network are linked together

The term physical topology refers to the way in which a network is laid out physically. Two or more devices connect to a link; two or more links form a topology. The topology of a network is the geometric representation of the relationship of all the links and linking devices

- (A) network
- (B) topology
- (C) connection
- (D) interconnection

Notes: https://www.sanfoundry.com/computer-fundamentals-questions-answers-network-topologies/

__ 1 33. three or more devices share a link in __________ connection.

Multipoint A multipoint connection is one in which more than two specific devices share a single link

- (A) unipoint
- (B) multipoint
- (C) point to point
- (D) simplex

Notes: https://www.sanfoundry.com/computer-networks-mcqs-basics/

__ 1 34. _____________topology requires a multiple connection

The preceding examples all describe point-to-point connections. A bus topology, on the other hand, is multipoint. One long cable acts as a backbone to link all the devices in a network.

- (A) star
- (B) mesh
- (C) ring
- (D) bus

Notes: https://www.sanfoundry.com/computer-networks-mcqs-topology/

__ 1 35. the participating computers in a network are referred to as:

The topology of a network is the geometric representation of the relationship of all the links and linking devices (usually called nodes) to one another.

- (A) clients
- (B) servers
- (C) nodes
- (D) CPUs

Notes: https://www.sanfoundry.com/computer-fundamentals-questions-answers-network-topologies/

__ 1 36. a topology that is responsible for describing the geometric arrangement of components that make up the lan.

The term physical topology refers to the way in which a network is laid out physically. Two or more devices connect to a link; two or more links form a topology. The topology of a network is the geometric representation of the relationship of all the links and linking devices.

(A) complex
(B) physical
(C) logical
(D) incremental

Notes: https://www.sanfoundry.com/computer-fundamentals-questions-answers-network-topologies/

__ 1 37. _______ topology requires a multipoint connection.

(A) Star
(B) Mesh
(C) Ring
(D) Bus

Notes: https://www.sanfoundry.com/computer-networks-mcqs-topology/

__ 1 38. Which network topology requires a central controller or hub?

In a star topology, each device has a dedicated point-to-point link only to a central controller, usually called a hub.

(A) Star
(B) Mesh
(C) Ring
(D) Bus

Notes: https://www.sanfoundry.com/computer-networks-mcqs-topology/
