EDUCATION

Helwan University – Faculty of Computers & Artificial Intelligence

2024 – 2028 (Expected)

B.Sc. in Computer Science & Artificial Intelligence

Grade: Excellent

EXPERIENCE

Front-End Development Trainee – ITI

July 2025 (1 month)

Learned HTML, CSS, and Bootstrap to build responsive web pages

- Practiced JavaScript fundamentals and basic DOM manipulation
- Explored React.js components and state management using hooks
- Completed hands-on exercises to strengthen practical front-end skills

AI & Data Science Trainee – DEPI (Microsoft Data Engineer Track)

November 2025 – Present

- Studying key Data Engineering concepts: Python, SQL & Databases, Data Pipelines, Big Data, and Azure
- Gaining hands-on experience with AI and data engineering projects
- Strengthening skills in deployment, prompt engineering, and real-time data handling

Projects

Library Management System | Java

- Built a Library Management System using Java and OOP principles.
- Implemented role-based modules for Admin, Librarian, and Patron.
- Managed book operations, user accounts, borrowing, returns, and reservations.
- Designed a simple GUI with persistent data storage using text files.

Front-End Website Project | HTML, CSS, JavaScript

- Developed a responsive museum website from scratch using HTML, CSS, and JavaScript.
- Implemented a ticket reservation feature to allow users to book museum visits.
- Added interactive features and applied core front-end concepts learned in college.
- Collaborated within a team to design and implement the project.

System Analysis Project – Car Sales System

- Prepared a complete Software Requirements Specification (SRS) document.
- Designed system diagrams: Use Case, Data Flow (DFD), Class, Sequence, and Activity Diagrams.
- Documented and analyzed core use cases: Login, Buy a Car, Request Test Drive, Make Payment, Submit Feedback.
- Analyzed functional requirements and detailed system workflows.
- Designed and developed a responsive Car Sales website using HTML, CSS, and JavaScript to demonstrate system functionality and user interaction.

Maze Game | Python

- Developed an interactive maze game using Python.
- Implemented game logic, player movement, and win conditions.

COURSES

Digital Egypt Cubs Initiative – MCIT & Udacity

October 2022 – October 2023

- Completed Level 2 program covering: Python Programming, Web Development (HTML & CSS), Data Analysis, Introduction to Cybersecurity, Digital Arts, and Embedded Systems
- Applied skills in a Python Maze Game project, practicing programming logic, problem-solving, and coding fundamentals

Digital Marketing – Google (Online)

EXTRACURRICULAR ACTIVITIES

- **Vice Director of Public Relations** – IEEE FCI Helwan University & TEDx Talaat Harb School
- **Organizer / Event Management** – BYF '23 (OBM Education), Egypt Career Summit '25 (Career 180), Google DSC Al-Azhar University, AI Summit (Rise Up), SYNC Summit (SYNC School)
- **Volunteer & Community Service** – Resala Charity Organization
 - Participated in community projects and volunteer coordination
 - Assisted in organizing events, managing logistics, and supporting local initiatives
- **Business & Volunteer Roles** – Business Development Member (Enactus Helwan University), Ambassador (OBM Education), Entrepreneurship Delegate (X Project Cairo University)

SKILLS

Technical Skills

- **Programming Languages:** Python, SQL, JavaScript
- **Front-End Development:** HTML5, CSS3, Bootstrap, React.js
- **Data Engineering & AI Tools:** Data Pipelines, Big Data concepts, Microsoft Azure basics

Additional Skills

- **Public Relations & Event Management** – organizing events, coordinating teams, managing logistics
- **Project Coordination** – managing timelines, delegating tasks, handling multi-step processes
-

LANGUAGES

English – Upper-Intermediate (B2)
